

## 2 PAC BACK'R

### *Installation manual*

**Read all directions carefully to insure proper operation, fire or burns may result from misuse of this product!**

- Low forward voltage drop 600mV @ 20 amps
- Auto select of higher voltage pack
- Built in noise canceling circuit >100Db
- Small size (smallest in market class)
- 22 Ga Heavy wires
- Lipoly – Li-ion - Ni-Mh or NiCad operation
- Increased voltage compared to other devices
- Increased servo speed

Ratings:

Max voltage on any input 10V (2-C LIPOLY)

Max load 10 amps per input (20 amps) Max  
5 cell operation (NiCad or Ni-Mh)

2 Cell Li-poly packs (must use volt Regulator)

See next sheet for wiring information.
